

## PLANISWARE FOR AEROSPACE & DEFENSE

### WHY SHOULD YOU IMPLEMENT AN INTEGRATED PORTFOLIO & PROGRAM MANAGEMENT SOLUTION?

Aerospace and defense companies have traditionally relied on military contracts and defense spending, subjecting them to fluctuations driven by geopolitical events and government budget allocations. To counter these challenges, successful companies strategically diversify their product portfolios, offering a spectrum including military and commercial aircraft, space systems, cybersecurity solutions, and logistics support. This diversification serves as a risk mitigation strategy, safeguarding against dependency on a single product or market segment.

Staying ahead requires a commitment to innovation. Aerospace and defense firms that heavily invest in research and development aim to pioneer cutting-edge technologies and enhance existing products for a competitive edge. This includes continual innovations in materials, avionics, propulsion systems, and cybersecurity.

The potential rewards are substantial, but so are the hurdles. Geopolitical factors, budgetary constraints, and technological advancements leaves leaders in these industries asking, 'How will I manage this complexity?'

Efficiency is key. Protecting margins is crucial. Having a single source of truth to optimize, plan, manage, collaborate, and communicate allows decision makers to react swiftly. In the age of digital transformation, it is no longer acceptable to have different point solutions to manage strategic portfolios and program data in disparate systems that are either manually integrated, or cannot communicate at all.

A robust and fully integrated Project and Portfolio Management solution brings all of these elements together in one place, allowing for visualization of interconnected information which is so critical to making sound business decisions.

# PLANISWARE IS AN INTEGRATED SOLUTION FOR STRATEGIC, PROGRAMMATIC AND OPERATIONAL PROJECT, PORTFOLIO MANAGEMENT

## Efficient Decision-making

Empower project stakeholders to make data-driven decisions based on accurate and up-to-date information.

## Increased Transparency

Create real-time visibility into project status, progress, and performance metrics for both internal and external work.

## Enhanced Collaboration and Communication

Facilitate seamless collaboration, information sharing, and decision-making across geographically dispersed teams.

## Improved Risk Management

Assess potential risks with the likelihood and impact to projects, programs, and portfolios.

## Ensure Compliance

Provide a more consistent way to track and manage internal and external deliverables.

# BENEFITS

## Strategic Alignment

A centralized view of all initiatives is critical so decision makers can prioritize and better align with the company's strategic objectives.

## Project Prioritization

Prioritize based on factors such as strategic importance, return on investment (ROI), and resource availability.

## Better Resource Visibility

Optimize utilization, minimize bottlenecks, and prevent overuse or underuse of scarce resources, including manufacturing facilities and equipment.

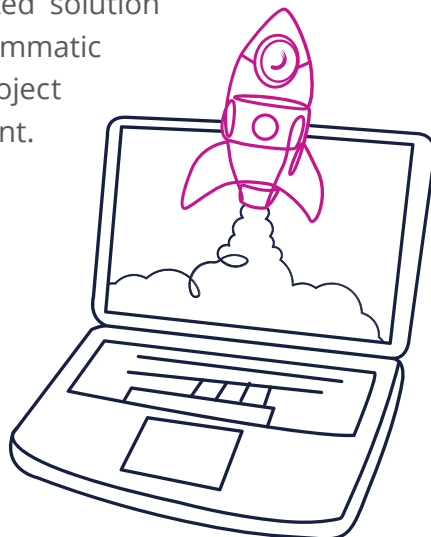

## Scenario Modeling

Compare proposals to reflect negotiation strategies, alternate bids and scope changes.

Planisware Enterprise has long been used by some of the most successful innovators and manufacturers in the aerospace & defense industry, bringing an integrated solution for strategic, programmatic and operational Project Portfolio Management.

- Airbus Defense
- Air France KLM
- ArianeGroup
- CAE
- Collins Aerospace
- CNES
- Dassault Aviation
- DGA
- L3Harris
- Lufthansa Technik
- Martin-Baker
- Naval Group
- OHB
- Onera
- Service Industriel de l'Aéronautique
- ULA
- Woodward

# PLANISWARE IS A CLOUD-BASED, PROJECT & PORTFOLIO MANAGEMENT SOLUTION THAT DELIVERS TRUSTED INSIGHT INTO PERFORMANCE ACROSS THE ENTIRE PROJECT LIFE CYCLE, REDUCING RISK AND IMPROVING PERFORMANCE.

## PORTFOLIO MANAGEMENT

### Decision support and strategic alignment across portfolios

- Customizable dashboards provide real-time insight
- Portfolio scorecards allow unbiased ranking to prioritize and align with corporate strategy
- Roadmapping capabilities connect internal and customer programs in a comprehensive view and uncover program dependencies
- Unlimited funding sources give more visibility to allocation & spending
- Built-in funding and change request speeds the review, approval, and funding process
- Alerts, notifications, and workflows provide more proactive monitoring for compliance reporting and governance
- Built-in BI capabilities instill confidence by providing more accurate and timely reporting

## PROJECT CONTROLS

### Fully integrated project management & reporting

- Parametric estimation, cost, schedule, resources, risks, and earned value in one solution
- Powerful workflow engine reduces time for approvals
- Dashboards and reporting allow real-time tracking for project KPIs
- Multi-level planning includes the ability to consolidate internally managed schedules with those of suppliers as a fully integrated IMS
- Integrated change management with approval workflows and eSignature capabilities
- Integrated contract management with WBS and CLIN ties to IMS
- Stage & Gate provides governance and workflows to ensure process compliance
- Predictive analytics to analyze risks and improve predictability of the projects

## PROJECT COLLABORATION

### Collaborate with internal teams and external suppliers

- Automate bid management to accelerate proposal writing
- Link or store documents directly in the project
- Complete risk, issue, and opportunity management
- Month-end cadence for status and reporting
- Delegate limited and secure access to external suppliers and partners
- Manage supplier communication
- Collaborate on documents while maintaining version control
- Provide mobile access to streamline updates & approvals
- Workflows and notifications provide alerts with relevant information to the right person
- Track meeting minutes, agendas, and action items
- Collect lessons learned to improve future projects

## PLANISWARE RECEIVES JOSCAR CERTIFICATION

Planisware is pleased to announce its recent JOSCAR certification, the accreditation and compliance system for defense, aerospace, and security sectors. JOSCAR's administration organization, Hellios, apply detailed and rigorous scrutiny to all invited applicants, which reassures their buying organizations that suppliers are "fit for business". By managing essential supplier data and providing relevant insight, Hellios builds confidence in the supply chains of industry communities in a cost-effective and agile way.

*Attaining JOSCAR certification demonstrates Planisware's commitment to working with the UK's aerospace, defence and security sectors. JOSCAR gives organizations in these sectors confidence that we are compliant with their standards.*

*The pre-qualification process smooths the path for those organizations to benefit from our world-lead project portfolio management solution.*

Your vision brought to life in the cloud. Software solutions to set projects, products and programs in motion.
